

Security

Simple, accessible,
advanced and secure
Security Solutions

Nouveau Security Solutions

Your people need to access your network, however with increasing internal and external threats, achieving the right balance between accessibility and security can be a real challenge. Nouveau help our clients make network security choices that balance speed, reliability, accessibility and security to meet their organisation's needs.

Fortinet Solution Portfolio

Fortinet is a global leader of Network Security appliances, which provide cost-effective end-to-end Security Solutions that protect your perimeter, core and endpoints from today's constantly changing threats.

Fortinet Key Benefits include:

- Consolidated security in one solution: firewall, anti-virus, anti-spam, web content filtering and wireless security
- Low bandwidth consumption
- No cost per user licence fee
- Easy to use systems – no specialist skills required
- Best of class: Year-on-year Gartner magic-quadrant leader for performance

With Fortinet solutions, threat activity – on both application and network layers - is proactively monitored and analysed by Fortinet's FortiGuard Labs using data gathered from its intelligence systems and FortiGate™ multi-threat security appliances operating worldwide.

FortiGuard Services are continuously updated, which enables Fortinet to deliver a combination of multi-layered security intelligence and true zero-day protection from new and emerging threats. These updates are delivered to all FortiGate, FortiMail and FortiClient products.

High Quality Performance

Fortinet has long been recognised as a global leader in providing high-quality, highly effective security solutions. It has recognised as the magic-quadrant leader year-on-year for Unified Threat Management (UTM) as well as Intrusion Protection Systems (IPS). Additionally Fortinet's product portfolio has been independently analysed and evaluated by NSS Labs, Forrester, Frost and Sullivan, Osterman Research and others, which have all highly recommended, awarded a status of excellence and/or top-ranked its solutions. These analyst reports can be found in Fortinet's resource centre: www.fortinet.com/resource_center
