

Infrastructure

End-to-End Traditional, Cloud & Hybrid
IT Infrastructure

Nouveau Infrastructure Solutions and Services

The increasing demands for technology flexibility from remote working, Bring Your Own Device (BYOD), virtualisation and Cloud is putting greater pressure on networks to deliver versatile yet highly-secure and high-speed network infrastructure. Through provisioning class of service, consolidating IT systems or complete or partial Cloud migration, Nouveau delivers free-flowing simplified networks without bottlenecks, and maintains the right balance between speed, accessibility, reliability and security

Infrastructure Optimisation

At Nouveau, we provide solutions that resolve infrastructure challenges and maximise return on investment. We provide voice, data and security systems, as well as tailored cost-effective managed services from auditing your network estate, through to design, configuration, implementation and ongoing proactive network monitoring and support. From core to edge for traditional, wireless, cloud or hybrid networks, Nouveau can optimise your network to make it secure, highly available and fast. We offer a broad range of integrated system components that cover virtually all physical and cloud layer needs, while our knowledge and expertise enables us to create the right IT infrastructure solution to meet each of our customer's needs.

Simplified Network Management

Network management can be simplified with a converged network infrastructure, virtualisation and unified communication to reduce overall cost and leverage communication enabled business processes. By converging voice, data and other applications into a single system, you can achieve increased productivity, lower costs, better security, and ease of collaboration.

Data Storage

A secure reliable data storage solution is a must have for every company. Nouveau can offer effective affordable storage solutions, including virtualisation and cloud capability to reduce operational costs, provide intuitive management consoles, leverage advanced software functionality and boost productivity.

Nouveau Infrastructure Services

We can source, install, configure and support your IT infrastructure, with expertise in:

- Infrastructure Audits
- Network Consolidation
- Virtualised servers
- Voice & VOIP
- Secure Data Storage
- Servers
- Routers
- Switches
- Cabling
- Security
- Business Continuity
- Disaster Recovery
- In-house Software Development
- Proactive Network Monitoring

Technology Maintenance Strategy

Infrastructure can often appear to be a costly and unpredictable budget item, with many organisations veering between a 3-5 year cyclical replacement and the “when it fails” replace it strategy. But working with the right technology partner, you can gain insight into what should be replaced and when, to make informed maintenance decisions, as well as understand what new and progressive networking options are available to you and how they can benefit your business operations.

Why Choose Nouveau?

Whether your goals are to take advantage of new technology capabilities, simplify network management, safeguard data or reduce operating costs, we can supply all your infrastructure requirements, and support you with:

- Knowledge and Expertise
- Customer-Centric Approach
- IT Support Excellence
