Software Development

Bespoke Online, Offline and Mobile Application Development Solutions

Nouveau Software Development

Nouveau's in-house cutting-edge software development team builds bespoke solutions to improve efficiency, productivity, insight and profit, as well as solve system, integration, data and software issues. Our solutions incorporate functionality that enable your staff to transact business quickly, accurately and with a customer-orientated focus.

Specialist Software Skills

Our software specialists will thoroughly investigate and understand your needs to create the optimally designed solution to achieve your goals, using both open source and Microsoft platforms and tools.

Our bespoke development projects have included:
• Portals integrated with Microsoft Dynamics
• Microsoft CRM customisation
• Software and systems integration
• Data extraction and analysis
• APIs
• System queries, reporting and dashboards
• Web interface business management systems
• Workflow implementations for company specific processes
• Advanced ticketing, leisure and automated marketing systems
• Advanced membership management and booking system

Solutions Tailored to Meet Your Needs

We recognise that business processes need to be efficient, integrated and relevant. We work with you to streamline your business processes, by developing and deploying tailored solutions to meet your needs. We also specialise in turning data into meaningful and intelligent business insight, so that you can fine tune your business model and compete more effectively.

If your business applications aren't delivering your business needs, our experts will evaluate what you'd like to achieve and take you on the first step towards a tailored solution that is right for you.

NSL CRM for Leisure

In the leisure industry, the ease, speed and functionality of business systems often makes the difference in maximising commercial success. Nouveau's NSL CRM solutions are designed for leisure centres, sporting, entertainment venues and tourist attractions to manage their customers, from engagement and ticketing, through to segmentation, crossselling and retention.

Based on standard Microsoft software and fully integrated to the MS Office suite, NSL CRM can optimise your sales productivity, as well as incorporating powerful management reporting capability. Our solutions deliver wide ranging functionality from a single framework to facilitate the day today administration and growth of your business.

PROP-SYS: Proposal Management Systems

PropSys is a system to manage all stages of the sales-aid leasing process from online proposal through to end of lease management. PropSys provides users with simple and intuitive screens to navigate the user through the lease process and provides a full audit trail of the proposal via its integration with Microsoft Dynamics CRM.

NSL CRM for Ticketing

Our NSL CRM Solution for Ticketing is a web-based package for ticketed events, sport, festivals and box offices. It helps organisations to manage, promote and sell ticketed events. Built on Microsoft Dynamics CRM platform, Ticketing provides a range of powerful marketing and reporting tools that enable organisations to promote and streamline events in real-time.

Microsoft Dynamics CRM Customisation

Sometimes an out of the box solution doesn't quite work how you want it to, or doesn't quite suit your unique business processes and this is where our team can help. With many years of experience implementing Microsoft Dynamics CRM customisation for clients we can custom-fit your CRM software to your business needs.

Business Intelligence Reporting

Volume of data is growing at a colossal rate and many organisations struggle to interpret this data into meaningful and intelligent business insight. Our expert team will transform your data and enable you to make business decisions based on sound business intelligence.

Why Choose Nouveau?

Whether your goals are to take advantage of new technology capabilities, simplify network management, safeguard data or reduce operating costs, we can supply all your infrastructure requirements, and support you with:

• Knowledge and Expertise

• Customer-Centric Approach

• IT Support Excellence
